

Marine Science Internship Bursary Application

BIOS sets tuition levels so as to cover immediate costs, but relies heavily on the support of donors. We recognize that the tuition fee may be prohibitive for some families, but are committed to making our educational opportunities available for all students regardless of financial means. For those families who cannot afford the full tuition cost, a limited number of bursaries are available to help offset costs.

BIOS undertakes to keep this information confidential and will not share it with other organizations.

School Attending: _____ Year Level: _____

Instructions

Please answer the following questions using extra pages and submit this form along with the general application.

Parent / Guardian

Please explain briefly why you are applying for a bursary. What is your financial need? How much financial aid are you requesting for your child to attend the program?

Student

Please describe your interest in marine science and why the ocean is important to you.
